Introduction

Dr. Kai Naumann

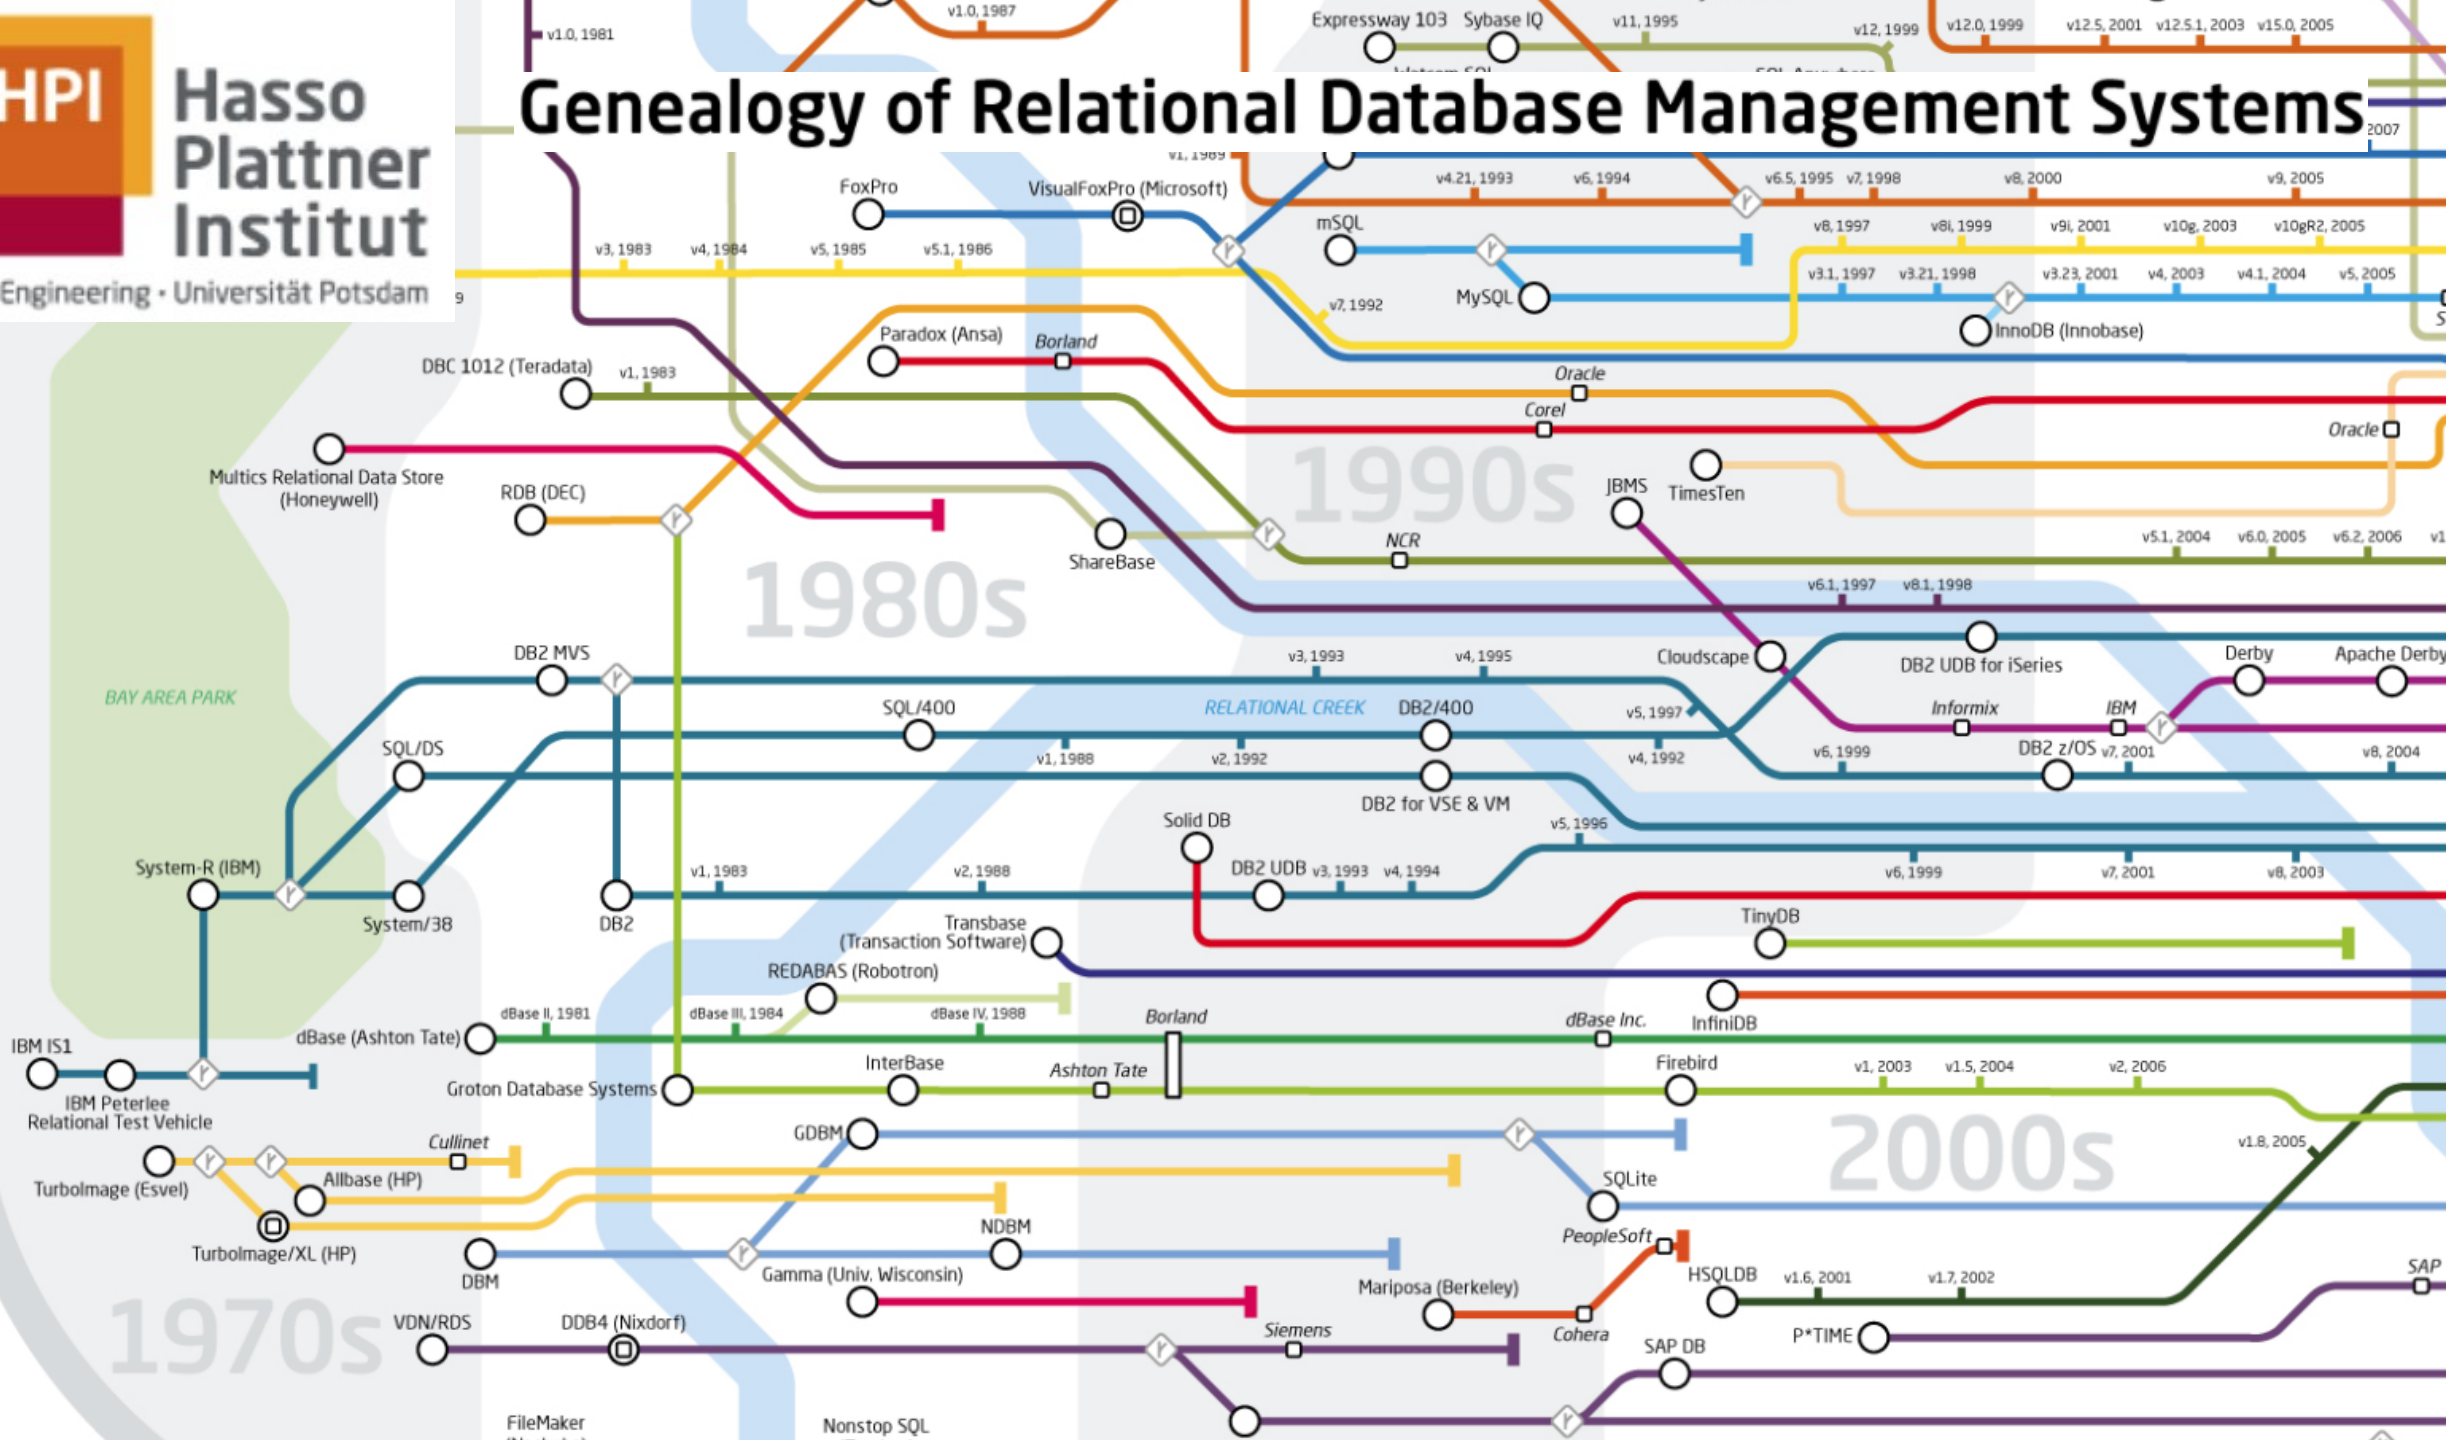

Databases for 2080 – Preserving database content for the long term (October 5th/6th, 2021)

What is a database?

- Graphical user interface layer (e.g. Web Browser, C# GUI library)
- Business logic layer (e.g. PHP, C#)
- Database management system layer (e.g. MariaDB, dBASE)
- Storage layer database (+ storage layer large objects) (e.g. Linux or CD-ROM file system)

Genealogy of Relational Database Management Systems

Research done so far (milestones)

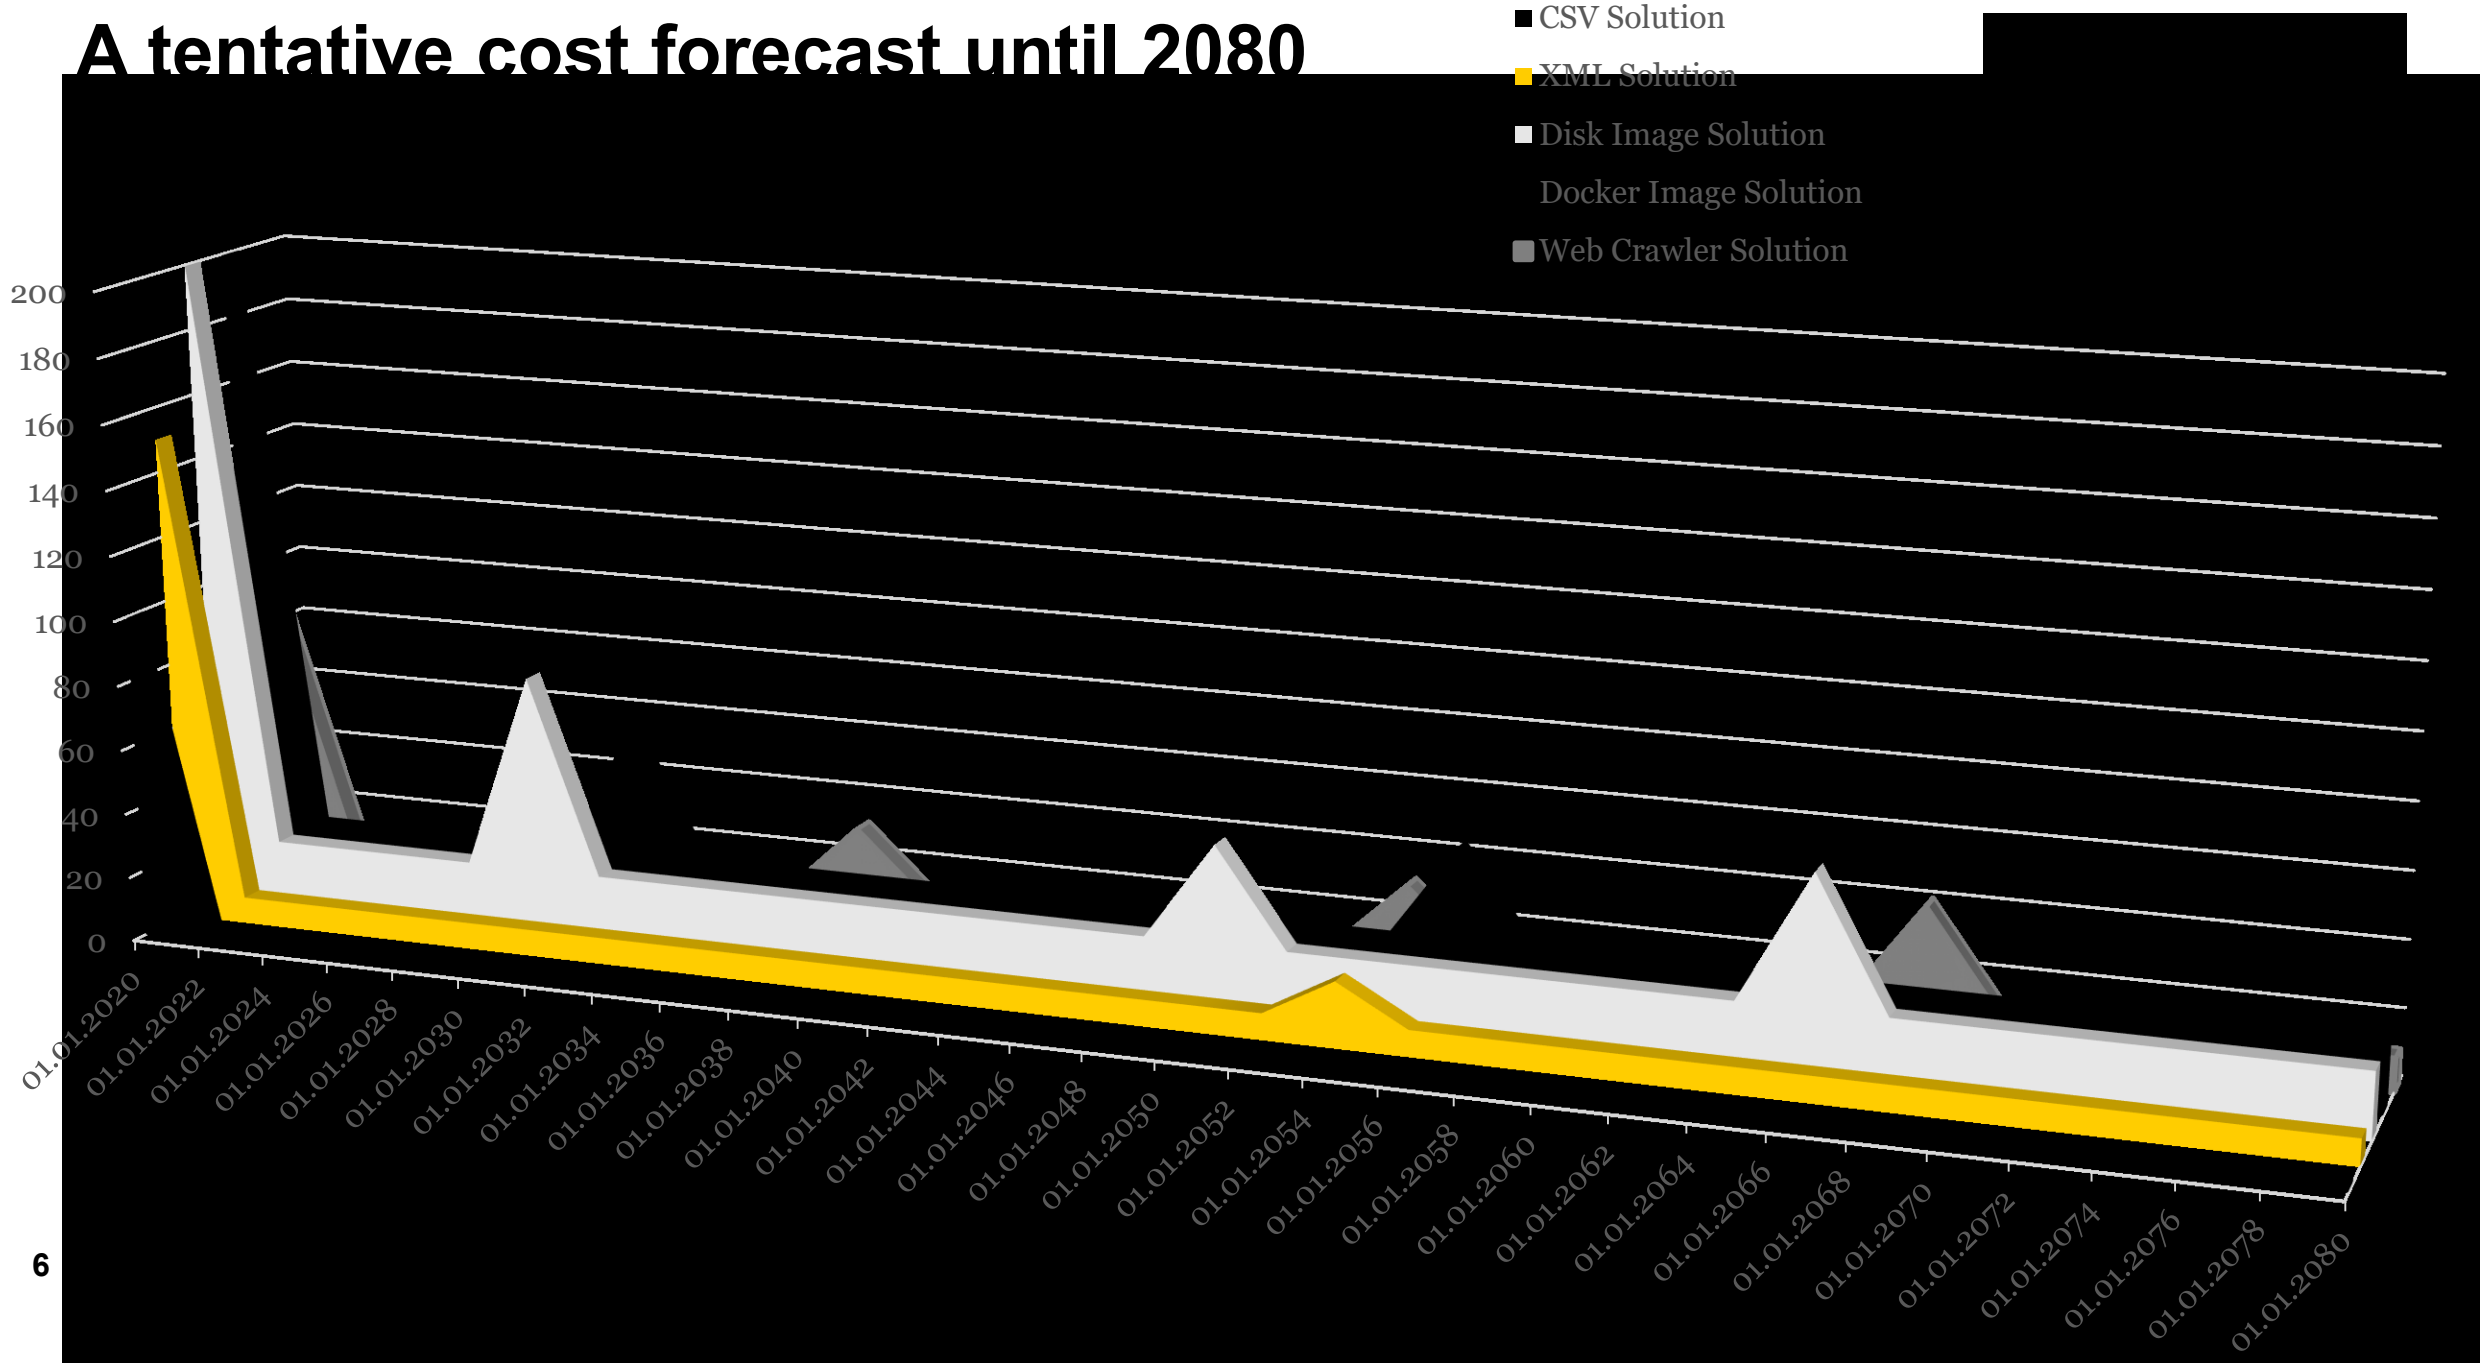

Year	Event
1983	<ul style="list-style-type: none">• Klopprogge and Lockemann on “Information Preserving Databases: Consequences of the Concept of Time”, in: VLDB '83: Proceedings of the 9th International Conference on Very Large Data Bases, S. 399–416.
2003	<ul style="list-style-type: none">• XML-Archiving of DB dumps (Zeller/Herbst/Kemper, https://dl.gi.de/handle/20.500.12116/30094)
2007	<ul style="list-style-type: none">• SIARD Format and Tool 1.0 released• First International Workshop on Database Preservation (PresDB'07), https://doi.org/10.1145
2013	<ul style="list-style-type: none">• SIARD Format 1.0 a Swiss national standard (updated to 2.1 in 2018) https://www.ech.ch/de/standards/60647• Proof of concept: database preserved through emulation at Land Survey Authority New Zealand: https://openpreservation.org/blogs/migrating-windows-2000-database-server-virtualized-and-emulated-hardware/

Outcomes of the challenge approach

- Challenge published in April 2020 (Naumann, WADL 2020, <http://hdl.handle.net/10919/99569>)
- Two responses with clear directions, also literature and some advice given during conferences
 - CSV Solution
 - XML Solution
 - Disk Image Solution
 - Docker Image Solution
 - Web Crawler Solution

A tentative cost forecast until 2080

Day 1: Options and Strategies

- 13:20 Brigitte Mathiak (GESIS): Sustainability strategies for digital humanities systems
- Raja Appuswamy (EURECOM): Storing and reviving databases on DNA
- 14:20 Coffee break
- 14:40 Florian Hartl (CSP GmbH & Co KG) and Albin Brandl (EfficientNodes GmbH): Database preservation for industry customers
- Klaus Rechert (University Freiburg i.Br.): Emulation options for legacy databases
- Damir Bulic (Spectral Core Ltd): Database preservation through conversion technology
- 16:10 Coffee break
- 16:30 Luis Faria (KEEP Solutions, LDA): Preservation through standardisation with DBPTK
- Kuldar Aas (National Archives Estonia): E-ARK standardisation efforts for databases
- 17:30 Short wrapup
- 19:30 Video chat (location to be announced)

Day 2: Standardisation, application, discussions

- 08:30 James Doig (National Archives Australia): Transfer and Preservation of Databases at the National Archives of Australia: Problems and Directions
- Markus Schmalzl (Directorate General of State Archives Bavaria): A tool for the preservation of data from governmental and research databases
- 09:30 Coffee break
- 09:45 Torbjørn Aasen (Intercommunal Archive Møre og Romsdal): Database ingest and use at public archives with the SIARD format
- Martin Rechterik (National Archives Czech Republic): DB archiving and use at Czech authorities
- 10:45 Parallel discussion groups (A) Standards, software, deployment and (B) Strategies, efficiency, documentation, see [Cryptpad](#)
- 11:45 Plenary with outcomes of parallel groups, discussion of contentious issues, outlook
- 12:45 Closing remarks
